

DOCSITE SOLUTIONS

## A new level of freedom. A new level of care.

### Highlights

- Measurably improve the quality of care and patient health
- Practice proactive patient medicine
- Access to the latest evidence-based medicine
- Leverage patient data for pay-for-performance and profitability
- Enhance existing workflow and patient visit efficiencies
- Easily integrate with existing systems
- Deliver flexible, scalable, easy-to-use capabilities
- Meet the majority of emerging “meaningful use” criteria

### The challenge to improve patient care

Providing quality care and ongoing healthcare management that achieves measurable improvements are top priorities for physicians. You want better ways to identify care opportunities and manage chronic conditions as you comply with ever-changing guidelines. To provide the best level of patient care—and remain profitable while seizing new opportunities such as the Physician Quality Reporting Initiative (PQRI) and “meaningful use” technology reimbursement government stimulus incentives—more physicians are turning to technology.

### Technology's promise: Hit or miss?

Adopting new technologies is often complex and time-consuming, and can be very expensive to implement and maintain. They require extensive training and restructuring of workflows, impacting business processes and

productivity. Today's solutions do little to empower you to provide better care and take advantage of quality-incentive programs. What's needed from technology? The ability to make the right decisions at the right time, while driving efficiency and profitability—for the best possible outcome for you and your patients.

### The Docsite solution

Docsite offers a modular, integrated set of patient care tools—along with superior consulting services and support—to help you measurably improve patient care. And Docsite does it without disrupting your workflow or putting restrictions on how you prefer to practice medicine. Our tools offer a low entry cost, with the ability to increase efficiencies and productivity, so you can focus your energies on your patients. With Docsite, you can transform how you interact with patients and network with your communities—for improved care and patient health.

# Integrating technology and medicine to improve patient care.

Healthier patients. Easier technology. Better operations. Increased profits.

## Enhance patient care

Docsite tools empower you to provide better care for your patients. They enable easy access to the information you need to deliver superior care day after day. Docsite tools fit seamlessly into existing workflows. In this way, they support you in your decision-making at each point throughout the clinical relationship—including pre-visit activities, examinations, post-visit analysis and reporting, and ongoing care management.

These powerful tools allow you to track, manage, and report on the preventive, acute, and chronic health needs of each patient you treat. They give you access to the latest evidence-based guidelines at the point of care. And they help you identify care improvement opportunities and intervention options across relevant patient populations. Quality of care and patient health improves when you can practice medicine more proactively. Docsite equips you with the capabilities to go on the offensive, enabling you to:

- Monitor, manage, and improve patient health at the individual patient level
- Track and treat multiple disease states in patients
- Follow, analyze, and contribute to improving patient health within populations

## Leverage technology—the easy way

Isn't technology supposed to simplify your life? Docsite would like to think so. That's why our tools are easy to implement and easy to use. Docsite tools are modular, flexible, secure, scalable, and especially user-friendly. Whatever your specialty, current IT environment, business goals, or compliance challenges, Docsite can easily fit into your practice. You can:

- Integrate Docsite into your current workflow, without needing to replace or re-engineer existing systems
- Use the tools as standalone systems to manage patients and participate in pay-for-performance programs such as PQR
- Implement a combination of Docsite products alongside your current electronic medical record (EMR) system, creating a unified view of patient health
- Use Docsite as your complete EMR system

## Improve efficiencies, reduce costs, increase profits

Following a simple implementation process, Docsite delivers a single, unified, Web-based view of the information you need, when you need it. With Docsite, you not only have at your fingertips the tools and insight to provide better care for your patients—but you can do it affordably. All you need is a standard computer and high-speed Internet access. There's no need to invest in additional software and hardware, or hire IT personnel to manage the system.

Enabling new efficiencies in daily operations and point-of-care activities, Docsite:

- Presents relevant information such as the latest evidence-based guidelines, preventive care information, electronic prescriptions, and in-depth reporting, at the point of care—reducing practice variation and misinformation while enhancing care
- Allows you to collaborate better with all participants through consolidated information—for enhanced communication and to support patient self-care initiatives
- Helps you run your practice efficiently and effectively—decreasing costs and improving care

## Docsite professional services

- Advanced analytics and custom reporting
- Meaningful use consulting and gap analysis
- Quality initiative and performance management consulting
- Office transformation
- Panel management consulting
- Advanced training programs
- Clinical research consulting

## Why Docsite?

For more than a decade, Docsite has been providing innovative solutions to physicians and other healthcare providers—with a continued focus on you and your patients. Thousands of physicians nationwide have already embraced the award-winning Docsite products as the solution of choice for providing quality care to more than three million patients. And today, our solutions meet the current meaningful use criteria for stimulus and CMS reimbursement initiatives. With Docsite's leadership, proven applications, and industry expertise on your side, you and your patients can benefit from care-focused, quality-driven healthcare solutions.

## DOCSITE TOOLS FOR PHYSICIANS

### caresentinel

The nucleus of Docsite, it powers the core set of Docsite tools:

**Point-of-Care Planner** – Summarizes key clinical information from the patient record and graphically highlights condition-specific indicators that are due or out of range, saving time during office visits.

**Patient Outreach** – Allows you the ability to identify patients in need of care and establish outreach measures to proactively bring them in for treatment and discussion.

**Performance Reports** – Provide click-through, drill-down, cross-functional reports for tracking patients, performance, diseases, and care trends—featuring report wizards for producing ad-hoc reports, plus the ability to automate or run reports on demand.

**Docsite CPOE** – An add-on to CareSentinel, it offers access to lab ordering, electronic prescribing, radiology, and other services including referrals, during the course of treatment workflows.

### connect

Serves as the foundation for all connectivity and interoperability services, allows you to share information among offices in your network, and is a prerequisite to almost all other services that operate with third-party products.

### qualitymanager

Provides direct access to the CMS system for reporting PQRI results, enables participation in other pay-for-performance programs, plus supports various business development activities.

The image displays three screenshots of the Docsite software interface. The top-left screenshot shows the 'Service Activity: Provider Detail' for Adam Provider, listing HbA1c values for three patients: DiabetesCore Kerry, Diabolo Jay, and Diabolo Joe. The top-right screenshot shows the 'Outreach Report: Phone' for Paul Provider, listing outreach activities for various patients including Diabolo Maria, Diabolo Martha, Diabolo John, and DiabetesCore Kerry. The bottom screenshot shows a detailed 'Outreach Report: Phone' for Richard Provider, listing outreach activities for various patients including Diabolo Maria, Diabolo Martha, Diabolo John, DiabetesCore Kerry, DiabetesHF Eric, DiabetesHF Josh, Diabolo Jay, and Diabolo Joe. Each screenshot includes patient names, MRNs, birthdates, phone numbers, ages, genders, and HbA1c values.

The nucleus of Docsite.

## Meeting meaningful use

Docsite tools allow you to specifically address the emerging meaningful use provisions being defined as part of the HITECH Act in the American Recovery and Investment Act. Meeting meaningful use will qualify you for direct reimbursement for your technology investment and future CMS payment incentives. As these programs move forward, Docsite will continue to develop capabilities that help you meet current meaningful use criteria.

Meaningful Use Objective*	Care Sentinel	CPOE	Connect	Quality Manager	Patient Place	Care Tracker
1. Use CPOE	●	●				
2. Implement drug-drug, drug-allergy checks	●	●				
3. Maintain problem list of current and active diagnoses						
4. Maintain active medication list				●		
5. Record and chart changes in vital signs		●				
6. Incorporate clinical lab-test results into EHR			●	●	●	
7. Report ambulatory quality measures to CMS or States			●	●	●	
8. Send reminders to patients for preventive/follow-up care			●	●	●	
9. Check insurance eligibility electronically	●		●			
10. Submit claims electronically	●					●
11. Provide patients with electronic access to health info	●					●
12. Provide clinical summaries to patients for each visit						

\*As of January 2010.
